Microchip/tattoo No 756 000 001 609 0784

I hereby declare that the dog submitted for examination under the BVA/KC/ISDS Eye Scheme is the one described above. I agree that the registration document should be stamped with the date of this examination and that the information obtained may be made available for research purposes and may be published (inclusion of these statements invalidates the certificate). Any appeal against the results specified below must be made to the BVA (for details see leaflet EPWPI).

## INHERITED EYE DISEASE STATUS

This section applies only to those conditions in the breeds specified in Schedule A of the Procedure Notes current on the day of examination. These results will be sent to the Kennel Club and/or ISDS as appropriate.

## CONGENITAL

CLINICALLY UNAFFECTED

CLINICALLY AFFECTED

## NON-CONGENITAL

CLINICALLY UNAFFECTED

CLINICALLY AFFECTED

(CEA) Collie eye anomaly:

- choroidal hypoplasia
- coloboma

(MRD) Multifocal retinal dysplasia

(TRD) Total retinal dysplasia

(CHC) Congenital hereditary cataract

(PHPV) Persistent hyperplastic primary vitreous:

(G) Goniodysgenesis

(GPRA) Generalised progressive retinal atrophy

(CPRA) Central progressive retinal atrophy

(HC) Hereditary cataract

(PLL) Primary lens luxation

The age of onset of non-congenital inherited eye disease varies in different breeds and between individual dogs. It is therefore important to follow any advice given at the time of this examination with regard to the necessity for and frequency of eye examination under the Scheme.

Clinically affected signifies that there is visible evidence of the inherited eye disease(s) specified whereas clinically unaffected signifies that there is no such evidence.

I have today examined the above animal under the BVA/KC/ISDS Eye Scheme and the results as shown
